

PanPastel has launched the world's first true pastel (dry color) mediums.

WHAT ARE MEDIUMS?

Mediums are additives that alter how colors work, extending the techniques and finished effects that are possible.

PEARLESCENT MEDIUMS

PanPastel Pearlescent mediums add a lustrous pearlescent sheen / shimmer which changes depending on the angle it is viewed from, also creating dimension. They are mica based. The mediums can be mixed with PanPastel Colors for custom pearlescent colors or used on their own for mixed media.

They have all the characteristics of PanPastel Colors, they are mixable, erasable, low dust, lightfast and professional artist's quality.

Mediums - Starter Set of 5 Ref. 30005

Ref. 20011

012 Pearl Medium - White COARSE
Ref. 20012

PEARL WHITE

Create your own custom pearlescent colors by mixing with PanPastel Colors. Use the white Pearl Mediums to tint colors and add a soft pearlescent sheen.
Note: Color + White = tint. (e.g. Magenta + White = Magenta Tint)

Depending on the desired effect - add more shimmer by increasing the proportion of Pearl Medium used when mixing with PanPastel Colors.

FINE

Contains smaller particles to create a soft and subtle pearl sheen.

COARSE

Contains larger particles to create a more shimmering sparkle.

TIP! If a pan surface (medium or color) becomes contaminated simply clean off with a clean sponge or paper towel.

Ref. 20013

014 Pearl Medium - Black COARSE
Ref. 20014

PEARL BLACK

Mix the Black Pearl Mediums with PanPastel Colors to create shimmering darks and shades for rich, jewel-like effects.
Note: Color + Black = shade/extra dark. (e.g. Magenta + Black = Magenta Shade)

Violet mixed with Pearl White and Pearl Black Coarse

Pearl Black Coarse over gouache (detail)
Suzanne Fellows

Note: it is difficult to capture the true sheen & shimmer of pearlescent effects in photographs.
