

AQUARELL STUDIO WATERCOLOUR

colour chart:

LUKAS watercolours are fine, premium quality paints with only pure, high-quality pigments. It has excellent workability and washability thanks to a binding agent made from pure gum arabic, selected dextrans and special glucose derivatives. Affordable, quality paints for students and professionals.

Pure, intense pigments combine with exclusive wetting agents to produce vibrant watercolours with exceptional coverage. With a smooth consistency, even among the granulating colours, you can create even washes.

The only difference between LUKAS Aquarell Studio watercolours and artists' grade paint is the use of high-quality substitutes in place of some traditional (and often toxic) pigments. Perfect for indoor work, travelling and Plein Aire painting, the plastic lid doubles as a mixing palette.
